

Continuous Improvement Engineer

Location Shepshed

Make a lasting impact on our organisation's performance!

Continuous Improvement Engineer is all about improving processes across production, planning, distribution, quality, and commercial functions. How can you help us in enhancing our processes, waste reduction, and drive or our operational excellence?

We are seeking a passionate Continuous Improvement Engineer. "Our new colleague drives innovation, tackles waste reduction challenges, and enhances efficiency across the organisation." Ready for a rewarding challenge?

What will you do?

As a Continuous Improvement Engineer, you'll identify process enhancements, execute projects, analyse data, and implement changes. Utilise Six Sigma, lean principles, and teamwork to achieve tangible benefits.

What to expect?

Expect a dynamic role where you'll lead Total Productive Maintenance projects, develop SOPs, and employ statistical tools to improve processes. Collaborate with operational teams, analyse trends, and make a lasting impact on our organisation's performance.

Meaning you will be:

- Identifying opportunities to improve process performance, reduce waste, and cost reduction.
- Planning and executing projects using continuous improvement tools to improve operational performance.
- Monitor data from available systems to identify trends where continuous improvement projects can deliver sustainable improvements.

- Working to continuously improve processes, predominantly in the production process but also across the organisation for example in Planning, Distribution, Quality and Commercial functions.
- Utilise statistical tool and lean principles to identify root causes and improve processes.
- Monitors progress of process improvements to ensure achievement of expected tangible benefits.
- Identify, develop and implement ongoing changes to existing SOP's and develop new ones as required to achieve improved performance.
- Implement mistake-proofing methods and develop workstation aids to assist in operations job performance
- Lead Total Productive Maintenance (TPM) projects

What's on your CV?

- Six Sigma Green belt
- Data analysis skills
- The ability to work with and influence operational colleagues
- Experienced in lean manufacturing
- Experienced in process mapping and identifying areas for improvement
- Proven track record of improving business process and building team members capability

Who are we?

With extrusion plants in The United Kingdom and The Netherlands, BOAL Extrusion specialises in designing, extruding and finishing aluminium profiles for a wide variety of sectors including building systems, profiles for high-quality partition walls, for façade systems, for ladder and access product manufacturing and fastening systems for solar panels.

Over five decades' worth of experience allow us to serve clients all over the world. Thanks to our in-depth knowledge of the industry's value chain, our clients enjoy delivery reliability and flexible timelines.

Minimising energy consumption and re-using natural resources are essential aspects of the ESG ambitions of our organisation and its clients. Scrap aluminium collected from BOAL Group's subsidiaries is recycled and re-used, thus minimising our carbon dioxide emissions and energy consumption.

What do we have to offer?

Working for BOAL Extrusion means working for a financially healthy company with an eye for people, short (communication) lines and a good name and position in the market (UK, Netherlands, Belgium, Germany & France).

You will work in a dynamic, changing environment with enthusiastic professionals. Both our sector and our organisation have experienced strong growth and development in recent years and will continue to do so, leaving room for your own personal and professional development. We are happy to support this development.

We offer £40,000 - 45,000 dependant on experience, Health Care Cash Plan or Bupa, free parking, contributory pension scheme, life assurance, retail discounts, 25 days holiday plus bank holidays, team events and of course engagement activities.

Equal opportunities for everyone!

We cherish the fact that we have a diverse team of people who complement each other with their knowledge, background and skills. When it comes to getting a job, we therefore believe everyone deserves equal opportunities. That's why we only look at a person's skills, abilities and talents. We feel that's what it's all about.

Would you like to come and work with us?
